

# Manage Your Supply Chain in Real-Time

## Digitize. Visualize. Synchronize.

It's easier than ever to digitally transform entire business processes with Activ. Our cloud-based, multi-enterprise platform provides painless connectivity with your suppliers, customers, distributors and other trading partners. Then we put the data to work for you—creating a pathway from integration to visibility to synchronization and ultimately to control enabling a digital supply chain.

Our customers improve operational efficiencies and effectiveness with:

- ✓ Ease of integration and data normalization
- ✓ Single system of record for customers, orders, shipments and more
- ✓ Real-time supply chain visibility
- ✓ Better decisions using machine learning, predictive, and prescriptive analytics
- ✓ Rapid identification of exceptions
- ✓ Tighter synchronization with partners

Without any capitalized IT costs, you'll see better profitability and performance in just a few short weeks.

- ✓ Supplier Portal
- ✓ Workforce Management

# A Foundation for Digital Transformation

Companies are embarking on a path to digitally transform their supply chain, but most lack a solid foundation to get there. With ActiVate's cloud-based platform, we can help you:

- ✓ Connect with anyone—suppliers, distributors or logistics providers
- ✓ Speed eCommerce and omnichannel strategies
- ✓ Modernize legacy systems
- ✓ Share anything—forecasts, schedules and S&OP—in real-time
- ✓ Gain end-to-end supply chain visibility

## Integrate & Normalize

Our rapid connectivity eliminates internal and external data silos and ensures proper processing produces a single version of the truth whether orders, inventory, status, or shipments. Take advantage of ActiVate's machine learning to parse, cleanse, normalize and extend data.

## Visualize & Maximize

Today's supply chain requires real-time visibility of supplier schedules, forecasts, inventory, capacity, orders, shipments and transportation movements. Our cloud-based platform facilitates rapid

identification of events and exceptions with real-time alerts tailored to each user.

## Synchronize & Manage

From customer portals to supplier portals, from demand to order management, and from inventory management to e-commerce, we help synchronize supply chain processes. And you benefit from smoother supply chain execution with machine learning, predictive, and prescriptive analytics.
