

It's easier than ever to digitally transform entire business processes with ActiV. Our cloud-based, multi-enterprise platform provides painless connectivity with your suppliers, customers, distributors, and other trading partners. Then we put the data to work for you—creating a pathway from integration to visibility to synchronization and ultimately to control—enabling a digital supply chain.

Without any capitalized IT costs, you'll see better profitability and performance in just a few short weeks. ActiV Technologies' platform as a service, ActiVate®, connects your trading partners and modernizes your processes. With ActiVate you digitally transform your supply chain processes and swiftly see, coordinate, optimize, and manage your end-to-end supply chains. You gain ease of integration, connectivity, data normalization, and extension, along with predictive and prescriptive analytics.

The screenshot displays the ActiVate platform interface. On the left, there is a 'Facility Map - Inventech' showing a map of the United States and Mexico with various locations marked. On the right, there is a table of Purchase Orders (POs) and a list of events for a selected PO. The PO table has columns for PO Date, PO Number, Mode, Vendor Name, Status, Origin Country, and Destination Country. The events table has columns for Change Date and Description.

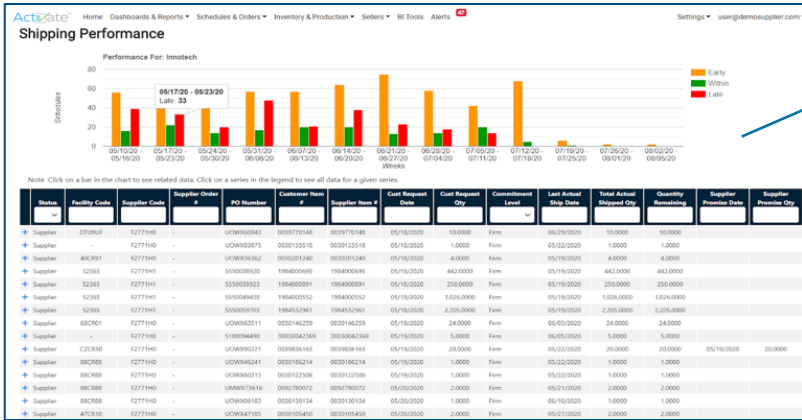

PO Date	PO Number	Mode	Vendor Name	Status	Origin Country	Destination Country
12/01/2021	449518269	Ocean	AJ-MEX SA DE CV	Cust Cleared	MEXICO	GUATEMALA

Change Date	Description
12/14/2021 00:00:00	Customs Cleared
12/14/2021 00:00:00	Port of Unloading
12/14/2021 00:00:00	Port of Loading
12/11/2021 00:00:00	ASN Sent
12/11/2021 00:00:00	Actual Ship Date
12/11/2021 00:00:00	PGId
12/08/2021 00:00:00	Documents Received
12/01/2021 00:00:00	PO Received
12/01/2021 00:00:00	PO Date

Low Inventory Alerts

Detailed Reports

ActiVate's economical and easily configured platform quickly helps drive profitability and performance. Companies and their trading partners synchronize forecasts, production, order and inventory management, and distribution capabilities in real-time, improving operational efficiencies and customer service.

## Integrate & Normalize

Our rapid connectivity eliminates internal and external data silos and ensures proper processing with data normalization and extension ultimately producing a single view of the customer.

Customizable/Configurable Dashboards

## Visualize & Maximize

Today's supply chain requires real-time visibility of supplier schedules, forecasts, inventory, capacity, orders, shipments, and transportation movements. Our cloud-based platform facilitates rapid identification of events and exceptions with real-time alerts tailored to each user.

## Synchronize & Manage

From customer portals to supplier portals, from demand to order management, and from inventory management to e-commerce, we help synchronize supply chain processes. And you benefit from smoother supply chain execution with machine learning, predictive, and prescriptive analytics.

ActiV Technologies is on a mission to help customers unleash their objectives for digital supply chain transformation—and the results speak for themselves. From small and mid-size businesses to the Fortune 50, companies depend on ActiVate to provide data normalization, integration, real-time supply chain visibility, and synchronization that quickly drives improved supply chain performance.
