

SUPPLY CHAIN VISIBILITY & DIGITAL TRANSFORMATION

START

CONNECT 001

01

Connect disparate sources of data. Connect multiple parties.

✓ Is the data from your business network connected and integrated?

✓ Is your business network sharing one version of the truth?

Normalize data into a common data model, language and format, then synchronize updates with host data sources.

02

SYNCHRONIZE 002

VISUALIZE & MANAGE 003

03

Visualize orders, inventory and shipments and manage operations and processes with end-to-end visibility.

✓ Is your data readily accessible to manage supply and/or demand fluctuations?

✓ Are you managing by exception using real-time data?

Leverage business rules to automate manual processes and use alerts and notifications for tighter control.

04

AUTOMATE & CONTROL 004

PREDICT & PRESCRIBE 005

05

With AI & machine learning incorporated into your digital transformation initiative, predict problems before they happen and prescribe preventive action.

✓ Does your data drive predictive and corrective action in your supply chain?
